Profile

Behavioral Scientist and Product Strategist with a background in fintech software development and 5+ years leading healthcare market research. Proven track record of leveraging behavioral frameworks (COM-B, EAST, cognitive bias analysis) to diagnose decision-making friction, design targeted product interventions, and lead executive strategy sessions. Skilled in managing research teams, spearheading corporate media/ podcasts, and translating complex human behavior into actionable, data-driven roadmaps for senior stakeholders. In my free time, I am a self-taught songwriter and wildlife photographer.

Strategic Questions I Solve

Adoption & Adherence: Why are users or patients not adhering to a regimen or workflow—even when it's critical or beneficial?

Product & R&D Strategy: Is it worth investing time and capital into an innovative product concept still in development?

Growth & Engagement: Why are positioning campaigns barely moving the needle despite having a superior product?

Friction & Behavior: Where are non-conscious barriers, habits, or complex workflows causing drop-off across the user journey?

JEREMY KOLOSKI

Behavioral Scientist | Product and Behavioral Strategist

Education

User Experience Research and Design Specialization
University of Michigan

MSc Behavioral Economics (First Distinction)
City University London

BA Computer Science
Brandeis University

Work Experience

Behavioral Scientist, Healthcare Research Worldwide

June 2021-August 2026

Behavioral Framework & Bias Analysis: Applied COM-B, EAST, and Socio-Ecological Models alongside cognitive bias analysis to diagnose decision-making friction, identify behavioral barriers, and design targeted product interventions.

Workshops & Facilitation: Designed and led interactive behavioral workshops, webinars, and strategic sessions for senior stakeholders to reframe challenges and prioritize short and long-term solutions.

Client Outreach & Pitching: Built countless pitch decks and pitched behavioral science offerings to prospective clients.

Communications & Media Strategy: Hosted the company behavioral science podcast (brainstormed the outlines, conducted the interviews, and edited the audio) and wrote thought-leadership white papers, blogs, and carousels to translate complex behavioral insights into engaging digital formats.

Process Management: Led an initiative to optimize internal workflows on Monday.com. Created a new behavioral science team to apply behavioral science concepts to internal company processes.

Staff Writer, The Decision Lab

October 2020-June 2021

Wrote articles for a global behavioral think tank, translating cutting-edge research in behavioral economics, psychology, and neuroscience for wider audiences.

Software Developer, Broadridge Financial Solutions

July 2017-August 2018

Modernized core software platforms in a fast-paced fintech environment.
